

AMMUNITION

While just about every ammunition manufacturer on the planet was in Germany for the show, of tactical note was CBC's subsidiary MEN (Metallwerk Elisenhütte GmbH) with their tactical Line of ammunition. American shooters probably know CBC via the Magtech product line.

Military and Law Enforcement agencies in the market for specialty rounds should take a look at MEN, which offers AP, APIT, SAPI and tracer rounds in 5.56, .308, .338 Lapua and .300 Win Mag. They also make an AP 9mm, as well as precision and limited-range .50 BMG. Nothing says 'barrier blind' like a tungsten core .338.
